**Is my athlete REALLY
ready to return to sport
following injury? : the
role of psychological
readiness**

Aim 1

Create a rationale for the consideration of psychological readiness when making return to sport decisions

Aim 2

Explain what psychological readiness to return to sport is, it's importance, and it's antecedents

Aim 3

Explain how the sports medicine team can monitor and make judgements over psychological readiness for optimal return to sport

The return to sport landscape

Return to the Preinjury Level of Competitive Sport After Anterior Cruciate Ligament Reconstruction Surgery
Two-thirds of Patients Have Not Returned by 12 Months After Surgery

Consensus guidelines suggest athletes should be physically and psychologically ready to return to sport (Andersen et al., 2016)

Physical
sports
(Podlog et al., 2016)

**Sport medicine practitioners
fell underprepared and
overchallenged to address
psychological aspects of
return to sport**

(Heaney et al., 2017)

every from
times

Athletes recovered from psychological aspects after returning to sport
(Phelan et al., 2019; Takuya et al., 2019)

What concerns do athletes tend to have when they return to sport?

(Carson & Polman, 2012; Forsdyke et al., 2016; Podlog, Dimmock & Miller, 2011)

How do I stop getting re-injured?

Will I be able to perform like I used to do?

What will my team mates, manager and fans expect from me?

Will I still be selected for the first team?

Will I still be considered a reliable athlete?

Who do I turn to if I have concerns?

What is psychological readiness to return to sport?

(Forsdyke et al., 2016; Webster et al., 2008)

Anxiety

(re-injury & performance)

Confidence

(remaining injury free & performance)

How is psychological readiness to return to sport developed?

(Forsdyke et al., 2016; Meierbachtol et al., 2018; Podlog et al., 2015; Webster et al., 2018)

Trust in sports medicine team

Quality of social support

Feeling wanted

Expectation management

Subjective symptoms and function

Achieving goals and specific criterion

What happens if an athlete is not psychologically ready to return to sport?

Increased risk of
re-injury
(McPherson et al.,
2019)

Less likely to
return to their
pre-injury sport
(Arden et al., 2014)

Less likely to
return to pre-
injury sport
performance
(Kitaguchi et al., 2019)

Reduced
functional task
performance
(Zarzycki et al., 2019)

How can I monitor & evaluate psychological readiness to return to sport?

ACL-RSI (Webster et al., 2008)

ACL-RSI (SF) (Webster et al., 2018)

SIRSI (Geromotta et al., 2018)

I-PRRS scale (Glazer, 2009)

**Psychological
readiness**

TSK (Miller, Kori & Todd, 1991)

RIAI (Walker, Thatcher & Lavalley, 2010)

**Anxiety/ fear/
kinesiophobia**

Psychological readiness to return to sport: three key elements to help the practitioner decide whether the athlete is REALLY ready?

Dale Forsdyke,¹ Adam Gledhill,² Clare Ardern^{3,4,5}

Box 2 Examples of tools (questionnaires and inventories) that may be used by practitioners to monitor psychological readiness to RTS (formatted versions of the tools are available as on-line resources)

► Re-injury Anxiety Inventory (RIAI): <http://www.sciencedirect.com/science/article/pii/S1466855X00000006>

Characteristics of an athlete who is psychologically ready to RTS are multifaceted and include, among others: realistic expectations, high levels of self-efficacy and low levels of anxiety (in context of performance and re-injury)

#1 Use tools to monitor injured athletes

#2 Use your working knowledge of the athlete

#3 The need for athlete-centred & interdisciplinary shared decision-making

A return to sport 'quadrant of doom'

Physical readiness to return to sport

Psychological readiness to return to sport

So in summary....

- **Currently, data suggests that returning athletes to back to sport after an injury in an optimal way is challenging**
- **Ideally, athletes should only return to sport when they are physically and psychologically ready to do so**
- **Psychological readiness to return to sport appears important and therefore should form part of the return to sport decision making process.**
